Second Announcement X Edition - BIWAES 2017

Biennial International Workshop “Advances in Energy Studies”

“Energy Futures, Environment and Wellbeing”

Napoli, Italy, 25-28 September, 2017

Please, share this announcement with colleagues and interested people

About

The BIWAES series started in the year 1998 and is now at its 10th edition. During the past 20 years, a community of scientists, industry and business energy experts, administrators and policy-makers, social and environmental stakeholders converged to different locations of the world to keep sharpening their focus on energy-related issues and build a critical mass and networks for improved understanding of costs and benefits of energy resources, technologies and uses.

This interdisciplinary effort stems from the awareness that science and technology achievements, economic processes, art and creativity, policy-making and governance, information networks, religions and worldwide social movements all may contribute to different extents to an appropriate resource and environmental management and fruition, in order to promote access to development means, better quality of life and environmental protection.

This Workshop edition is about energy and wellbeing. We are all aware that the ways societies self-organize, grow, change and decline are affected by and in turn affect resource availability. Two basic resources, energy availability and environmental quality, determine processes, lifestyles, relations, population dynamics, trade, and ultimately migrations, wealth and poverty, and world stability.

Participants are therefore invited to share their energy-related scientific, technological, economic and social findings and insights, in order to contribute to a better understanding and management of the present world dynamics, with special focus on energy use and environmental quality.

Workshop Venue

Villa Doria D’Angri, Via Francesco Petrarca, 80, 80123 Napoli, Italy. Phone: 0039-081-547 5417,
<http://biwaes.uniparthenope.it/index.php/venue/>

Deadlines

This Workshop is designed to promote scientific dialogue and collaboration. A small number of attendees is a pre-requisite for productive interactions. As a consequence, only 100 participants will be accepted. Priority is given based on registration order.

Abstracts submission: 30 March (<http://biwaes.uniparthenope.it/index.php/abstract-and-paper-submission/>)

Registration: 31 May (<http://biwaes.uniparthenope.it/index.php/registration-and-invitation-letter-for-visa/>)

Hotels

See updates on website: <http://biwaes.uniparthenope.it/index.php/accomodation/>.

Due to September still being holiday season in Napoli, may we suggest you to perform your reservation as soon as possible, also to benefit of discounted fares agreed upon with the Hotel Managers. We have discounted fares until March 20, 2017.

Publication of results

As always, results will be published in a Book of Proceedings (made available during the Workshop) and Special Issues of the following peer-reviewed and indexed International Journals:

Energy_The International Journal

Energy Policy

Ecological Modelling

Environmental Accounting and Management

Energy Research & Social Science

International Organizing Committee

<http://biwaes.uniparthenope.it/index.php/organizing-committees/international-organizing-committee/>

Web

A Workshop website, with further details, online registration, submission procedures and fees, is available at: <http://biwaes.uniparthenope.it> and is updated weekly.

Websites of last two editions are also available at:
